

ELECTRICAL PRODUCT MANAGER

Your new challenge

As Electrical Product Manager (EPM) you will manage the technical documentation of the entire product line. This ranges from product specifications to installation manuals. You provide the technical content for the commercial documentation.

In addition, you are responsible for first-line technical advice when both our own internal employees, and external customers are confronted with non-standard products and/or solutions.

Your responsibilities

- You document and record the substantiation of these non-standard products and/or solutions.
- You work closely with the Engineering department for the development of solutions (incl. the necessary material calculations) and with the Sales department for the consideration of the commercial feasibility of the proposed solution.
- You always conduct the necessary research into material specifications, available suppliers, processing methods, etc.
- In your role as EPM, you are responsible for monitoring any changes in the various electrical norms and standards applicable to our company.
- Product certification and the active supervision of type tests on our products, in cooperation with accredited European laboratories, are also among your responsibilities.
- You will report directly to the Head of Product Sales.

Your profile

- You hold a bachelor degree in a technical background (e.g. Electromechanics) or you have the equivalent through experience.
- You have knowledge of electricity, with an affinity for high current applications.
- You are proactive.
- You are technically creative and problem-solving.
- You are result-oriented, structured and organized.
- Required computer knowledge:
 - Microsoft Office;
 - Google Drive and applications;
 - Autodesk Inventor;
 - Autodesk AutoCad.
- Knowledge of the English language is a must.
- This vacancy is also open to people from Ukraine residing in our country and enjoying temporary protection.

ELECTRICAL PRODUCT MANAGER

Our offer

Eta-com offers you an exciting job with numerous challenges and your own responsibilities with a niche player in the modern energy market.

You will join a dynamic and ambitious team with a pleasant working atmosphere.

You will receive a full-time contract for an indefinite period with a competitive salary and fringe benefits such as meal vouchers, group insurance, hospitalisation insurance, etc.

You will also enjoy a flexible work schedule, 32 days of holiday and the necessary development opportunities.

Selection procedure

The first selection is made on the basis of your motivation letter and CV. The selected candidates will be invited for an introductory interview. The second selection is based on a written test. During the tests, expertise as well as skills and competences are tested.

Interested?

If you think you would be an asset to our team, please send a motivated cover letter with CV to Eta-com, attn Ms. Troch, HR manager, Scheldeweg 4, 2850 Boom or by email: nathalie.troch@etacomcs.com. Your response will be dealt with quickly and confidentially.

Don't qualify yourself, but know someone who does? Then be sure to forward our vacancy.
